The Mini Master Preformed All Purpose Tilt Utility Trailer has 100+ uses. Whether it is used for hauling scissor lifts, ATV's, lawnmowers, jet ski's, snow mobiles, motorcycles, landscape equipment or a variety of other items, it is the perfect preformed utility trailer. Having the bed constructed out of one piece of steel with knife edge ramp and sides that will range in depth with the different widths makes a very sturdy utility trailer. The no skid textured floor gives better traction when loading your ATV's or other equipment. There are four D-rings set inside the bed for more load security. This is the perfect utility trailer for all of your small equipment needs.
